Telephone number (optional): (____) _____

I request that these comments be made a part of the official record.

Violates the Nuclear Waste Policy Act of 1982.

- The fundamental concept of geological disposal as outlined in the act was for waste isolation. Instead the DEIS describes and "evolving" facility design based on delayed release of radioactivity by means of engineered barriers, so the site will leak. How much and when is not clear.

I think this is a horrible idea!!
Nuclear waste is unsafe to begin
with and transporting it anywhere
is extremely dangerous. I have
a young child who I travel
with & would absolutely not want
to be on the road with nuclear waste.
And to put it on sacred ground
is wrong, and disrespectful.
I definitely do not agree!

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.
